

Load your boat with fish this summer with a kayak that has a place for everything and is more comfortable than ever before.

▶ How we've made organising your fishing easier for you.

There's a place for everything and all within arm's reach. There's enough fishing gear fitted as standard to get you up and running straight away but plenty of accessories available as you get more skilled. We've even fitted internal mounted lugs for batteries and other electronics such as fish finders.

Want to lose less gear and capsize less often?

You can turn around, fish sideways, manage anchors and nets all due to the stable hull design that makes a easy to use fishing platform. This design also makes it easier to get out through the waves and paddles easily so you don't tire as quickly.

Worried about losing your rods if you tip out?

The Catch390 has an internal rod chute meaning safe stowage of your rods for getting in and out through the surf line.

Kit your boat out with all the accessories:

Secure your catch

Fish stringer and line keeps the ones you caught

Keep fish fresh with this water tight sock

The fish sock fits into the front hatch giving you a place to store your catch and keep your kayak clean

Secure your paddle or rods

This leash makes sure it's attached to your boat

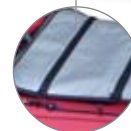

Keep fishy stuff and gear such as lines and anchors separate

Plastic divider for tankwell

Attach your fish finder

With ease using our custom-made fish finder attachment

For catching big fish, works well with the divider - insulated cover for tankwell

Easily safely stow another rod

Fit another rod chute with this kit

Control sea anchors and anchors alongside of the kayak.

The anchor running line kit keeps you organised

Take out ice and bait and bring back the fish fresh and contained in the insulated fish bag

Catch 390: The facts

Length // 390cm
Width // 85cm
Weight // 28kg
Max Load // 230kg
